

Smart monitoring slashes bills by £9,000 per Year...

The Background

Smarta's Utilities Manager Monitoring Service was implemented at a large town centre office block and confirmed a low level of ongoing consumption, equivalent to annual costs of £1,500 per year

Initial findings

The graph (below) shows how the consumption increased suddenly. The customer was notified straight away and investigations to locate the cause started. Smarta were pleased to provide advice with the urinals turned off at the end of the day.

The Results

The impact on consumption is very clear, with the overnight flow reduced to zero confirming the

leak / excessive consumption caused by malfunctioning urinals was resolved.

Summary

Without our daily checking service the increase in consumption, and higher water use would have gone unchecked until the next water bill was received. Moreover, the increase may have simply been attributed to increased use on site in this busy office complex.

Through our daily checking service and alarm notification system we ensured the customer saved paying an extra £9,000 per year.

Smarta's daily monitoring service helps to ensure increases in consumption are spotted immediately ensuring costs can be reduced promptly.

Smarta monitors the water consumption of each of our customers every day. As soon as a problem is identified, the customer is informed, enabling the cause to be found and the problem rectified as quickly as possible.
